

CTBUH Tall Building Image Form

The Council on Tall Buildings and Urban Habitat, as a not-for-profit organization designed to facilitate exchanges among those involved in all aspects of the planning, design, construction and operation of tall buildings, maintains one of the world's largest and most accurate databases of tall building information. This database is now available online and is searchable by a number of parameters, including year of completion, building location, building type and much more. The database also provides a "profile page" for each tall building project listed. In an effort to ensure the accuracy of all data and provide images for each tall building, the Council has begun to have data confirmed and images provided by companies actually involved with each project.

Please complete this form by providing images and copyright information for the CTBUH to enhance building profiles on the CTBUH Tall Building Database.
